

# Five steps to a Modern Workplace solution from IT Champion

## Start

Reach out and take our offer of a FREE demo

1

### Witness the benefits

Our **FREE** discovery session shows you the power of modern workplace solution, how the technology powers real business benefits and demonstrates how they can be deployed in your organisation.

2

### Discovery and workplace audit

We work with you to uncover the reality of your networks and IT infrastructure. Help you envision the elements of your modern workplace solution to meet current and future work patterns and overcome frustrations to enable your people to work smarter and increase collaboration and productivity.

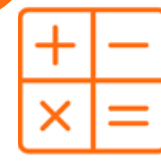

- Create a plan of work with priorities, timelines and costings
- Inform you on the tangible benefits the solution will deliver to your data, devices, cyber security and compliance
- Highlight how you can optimise Microsoft 365 licensing
- Outline how to obtain a strong foundation for your data, systems and applications

### Envision, create and plan deployment

Once you know what is possible we will work with you to pull together the detail on how to implement a modern workplace solution that fits within your budget, work patterns and strategic goals.

3

The quality of Modern Workplace Solution is based on the performance of your IT ecosystem; data, devices, communication, cyber security and regulatory compliance. A fully functioning solution means your people can do more with less.

## Next

Implementing and maintaining an optimal performance

### Implement the changes and measure the business benefits

Working together we start to deploy your modern workplace solution. Embedding and measuring each phase to ensure optimal performance and at a rate that doesn't interrupt important business.

4

### Review and optimise the gains in productivity

Once your solution is in place we work with you to make sure it adapts to changes in your organisation, goals and strategic aims. Technology needs to be managed to ensure the experience for users is smooth.

5

### Good to know:

- A modern workplace solution that can bring value, reduce the cost of risk, automate key IT processes and increase employee productivity
- We manage modern workplace solutions that support hybrid working practices. Our clients span organisations with a handful of users, all the way up to large enterprise-sized businesses and educational organisations and charities with thousands of users worldwide

As a Microsoft Modern Work Solution Partner, we have the expertise, knowledge, and a range of technology to create, deploy and manage your organisation's modern workplace solution.
